

PILLAR Group

Environmental Policy

【Basic Policy】

We, the PILLAR Group, recognize that addressing ESG/SDGs is a common challenge for humanity. We actively engage in environmental conservation through our business activities, being aware of our corporate social responsibility and based on our corporate philosophy, purpose, and PILLAR CORE VALUES.

Additionally, by contributing to the development of local communities, we aim for the sustainable development of both society and our company.

(1) Compliance with Laws and Regulations

We will establish and comply with voluntary standards that take into account not only domestic and international environmental laws and regulations but also social demands.

(2) Development of Products Contributing to Environmental Protection

We will develop technologies and products that contribute to the realization of a sustainable society through not only performance improvement but also environmental protection as a manufacturer of fluid control-related equipment.

(3) Reduction of Greenhouse Gas Emissions

We will promote energy-saving initiatives and the adoption of renewable energy, striving to reduce Greenhouse Gas Emissions generated through our business activities.

(4) Conservation of Water Resources

We will use water efficiently to reduce our water abstraction and remain committed to the protection of water resources.

(5) Efficient Use of Resources

We will use resources and energy efficiently and work to reduce waste by promoting resource circulation.

(6) Continuous Improvement Activities

We will recognize the environmental impact of our business activities and continuously improve our environmental management system.

(7) Collaboration and Cooperation with Stakeholders

We will develop environmental conservation activities in collaboration and cooperation with stakeholders to meet societal expectations.
