

We are a manufacturer skilled in the design, development, and manufacture of equipment to control fluids such as water, oil, toxic gases and chemicals, and more.

CLEAN

Our products are used in facilities that are essential to the functioning of daily life. Moreover, they contribute to environmental preservation, resource conservation, and

the protection of lives and property.

Chemicals

Gland packing, gaskets, mechanical seals, circulation

Petroleum Refining & Petrochemicals

Gland packing, gaskets, mechanical seals

Energy & Environment

Gland packing, gaskets, mechanical seals, seismic isolator/slide bearing

Shipbuilding

Gland packing, gaskets, mechanical seals, seismic isolator/slide bearing

Construction

Gland packing, gaskets, mechanical seals, seismic isolator/slide bearing

FRONTIER

Semiconductors

Gland packing, gaskets, mechanical seals, circulation

Aerospace

Water & Sewage

Gland packing, gaskets, mechanical seals, seismic isolator/slide bearing

Automotive

Gland packing, gaskets, circulation, others

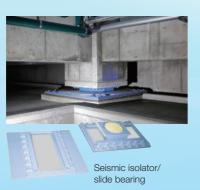

Railways Seismic isolator/slide bearing

Note: Circulation products for the clean market

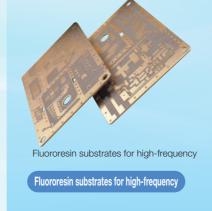

Sample Uses

Semiconductor cleaning equipment

Structure fitted with seismic isolators

Foodstuffs, Medical Care & Pharmaceuticals

Gland packing, gaskets, mechanical seals, circulation
